Figures

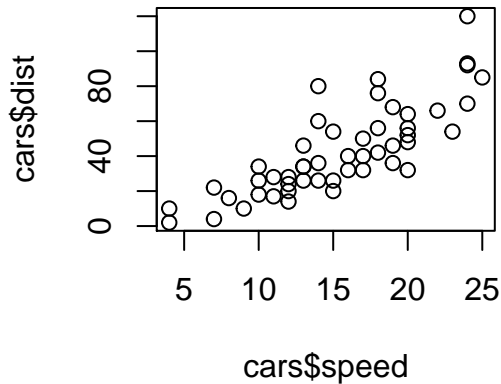

Figure 1: Caption for figure

Figures

You can still use `\includegraphics` for a finer control

Plots

Tables

You can easily include R code and results

```
head(cars) %>%  
  kable(caption = "A sample table")
```

Table 1: A sample table

speed	dist
4	2
4	10
7	4
7	22
8	16
9	10

Formulas can be entered in-line, as in $\bar{X} = \frac{1}{N} \sum_i^N X_i$; or also in a new paragraph:

$$\bar{X} = \frac{1}{N} \sum_i^N X_i$$

Thanks!
